Chongqing Technology and Business University China
B.A. in Accounting GPA:3.6/4.0 Sep 2010 Jun 2014

G Related Courses: Financial Accounting, Costing Accounting, Auditing, Financial Management

RESEARCH INTERESTS

Health Economics, Labor Economics.

WORKING PAPER

The Impact of Critical Illness Insurance on Consumption and Savings

China introduced the Critical Illness Insurance (CII) program in 2012 to address persistent concerns over high out-of-pocket medical expenditures and financial risk by providing additional coverage for substantial medical expenditures. To account for the staggered implementation across regions, I employ the Difference-in-Differences (DiD) approach proposed by Callaway and Sant'Anna (2021) to examine the impact of the CII program on consumption and savings among rural households and people aged 60 and above, but no incentives for poor families, leading to increased consumption inequality. Results from event study specifications and placebo tests support the causal interpretation of the estimates. My findings suggest that the CII program was successful in improving the financial protection of older adults.

The Impact of China's Critical Illness Insurance Program on Health Care Expenditures among Rural Households

TEACHING ASSISTANT

USF Department of Economics

Aug 2020 –Aug 2021

G Microeconomic Principles

G Advanced Price Theory
