EXECUTIVE SUMMARY

The Criminal Justice, Mental Health, and Substance Abuse Technical Assistance Center (herein referred to as CJMHSA TAC), as required in Section 394.659, F.S., is pleased to present our FY2020-21 Annual Report to the Governor, the President of the Senate, and the Speaker of the House of Representatives.

This report covers Fiscal Year 2020-21 including activities provided by three planning grantees and 25 implementation/expansion grantees. Each grant operates on a project-specific grant period, defines its specific target population, and provides a scope of service unique to the county

(LHZ71), SMA Healthcare (LHZ99, Putnam County), and Southeast Florida Behavioral Health Network (LHZ90, Indian River County).

Nine implementation/expansion grant programs completed their three-year grant programs in FY20-21. While not all performance measures were met, all nine were generally successful in meeting the overall goals stated in their initial applications. These grantees must explore sustainability options, examine opportunities to integrate reinvestment grant programs into their existing infrastructure, and pursue additional grant opportunities as they become available. Continued efforts should ensure that workflows, partnerships, and service arrays established during the grant program can maintain improved outcomes among the target population of individuals with mental health, substance use, and/or co-occurring disorders who are involved in the justice system.

Nine implementation/expansion grant programs have completed between two and three years of operation or have a no cost extension and have made considerable progress toward achieving their goals.

Seven implementation/expansion grants have been operational for one year or less and are on target to achieve their goals.

facility. Six grantees reported because it was either too early to report, it was not applicable

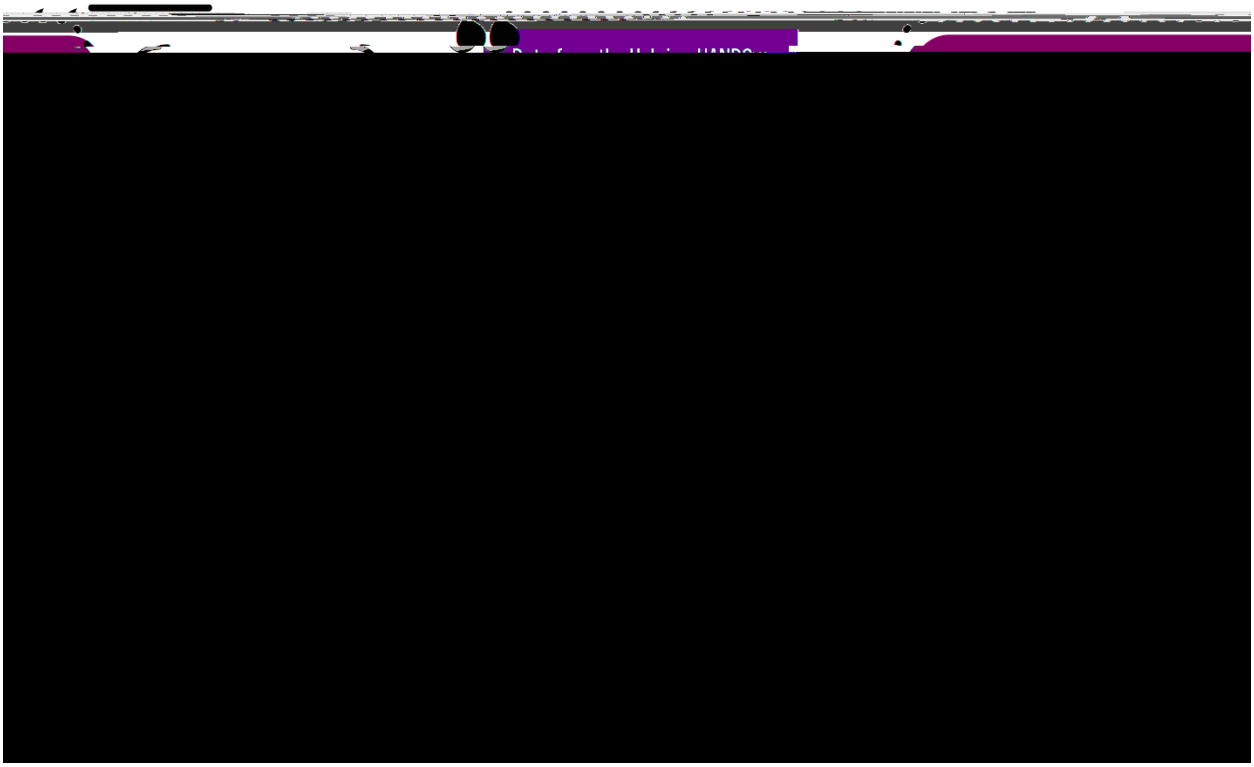
Implementation/Expansion Grantee	Diverted 100%	Some diverted

Table 5.

Grantee	Fiscal Impact (Costs avoided)	Additional Human Resource Savings	Contributing Factors
Centerstone of Florida (Sarasota County) (LHZ84)	$186,000	-	Reductions in arrests
Hillsborough County BOCC (LHZ69)	$336,450	-	Diversion from jail to grant program
Pinellas County BOCC (LHZ91)	$58,778	-	Diversion from juvenile detention
SMA Healthcare (Putnam County) (LH772)	$85,808	812 law enforcement hours	Reductions in jail days and law enforcement personnel hourly costs for transporting individuals under a Baker/Marchman Act Order
SMA Healthcare (Putnam County) (LHZ99)	$17,817	169 law enforcement hours	Reductions in jail days and law enforcement personnel hourly costs for transporting individuals under a Baker/Marchman Act Order
Southeast Florida Behavioral Health Network (Indian River County) (LHZ90)	$1,454,500	-	Reductions in jail days
Southeast Florida Behavioral Health Network (Okeechobee County) (LHZ70)	$694,000	-	Reductions in jail days
Total across reporting Grantees	**$2,833,353**	**981 hours**	

The visuals below (**Figure 1.**) represent testimony drawn from grant reports that discusses the program impact on these expenditures. These successful diversions can substantially reduce the cost of criminal justice expenditures but are not always reflected as a 1:1 savings in jail, detention centers, and prison budgets.

Figure 1.



Grantee reports continue to describe the positive impacts that their programs are having on the local jail and/or detention population through a reduction in arrests, shorter jail stays, and increases in access to treatment, housing, benefits, and diversion efforts. More details are later included in this report's grantee profile section.

these goals. **Table 6** provides an overview of the number of individuals served over the lifetime of each grant and the number of individuals who participated in CIT or MHFA training in the grant-funded programs where the expansion of CIT/MHFA is a stated goal. Although Tables 2 and 6 are similar, they present different information. **Table 2** presents information on the

IMPACT OF COVID-19 ON REINVESTMENT GRANT PROGRAMS

Beginning in early 2020, the COVID-19 pandemic began impacting Florida and normal program operations statewide required nearly immediate modification to both accommodate the Governor's Executive Order re: Emergency Management and adhere to Centers for Disease Control and Prevention (CDC) guidelines for prevention of infection and spread. While COVID-19 restrictions loosened and many programs returned to in-person or hybrid operations throughout FY20-21, grantees continued to experience a wide variety of impacts as a result of the pandemic.

Collaboration/Stakeholder Engagement

Measure	Performance
100% of **formal partnerships established**, as evidenced by legally binding agreements, with a minimum of three agencies within 180 days of contract execution.	November 11, 2020: 3 Memorandums of Understanding (MOUs) in place
100% completion of determining the methodology for **data sharing** and reporting among partners within 270 days of contract execution.	March 31, 2021: data collection and sharing process submitted
100% completion of **report that addresses identification and mitigation of local policy, legal and social barriers** that target population will encounter within 270 days of contract execution.	March 31, 2021: barrier report submitted
100% completion of **Youth Mental Health First Aid** training for 20 behavioral health personnel within 365 days of contract execution.	June 14, 2021: in-person YMHFA training held for 15 participants; June 23, 2021: virtual YMHFA training held for 6 participants
100% completion of **strategic plan** within 365 days of contract execution.	May 4, 2021: Strategic plan finalized and approved

Not applicable for the planning grants as they do not support direct services.

Summary of How Local Matching Funds Leveraged Additional Funding to Further the Goals of the Reinvestment Grant Program

HANLEY FOUNDATION (GLADES COUNTY) (LHZ92)

START: July 1, 2020 **END:** June 30, 2021 **AWARD:** $100,000 **TIME FRAME:** 1 Year

Target Population

The target population for this planning grant was middle and high school youth with mental health and/or substance use issues involved in or at risk of entering the juvenile justice system.

Goals/Objectives

The overall objective of this planning grant was to develop a strategic plan through key stakeholder collaboration in the service area. The strategic plan identified the development and expansion of pre-trial diversion programs and increased access to juvenile-serving programs as high priorities for the community to reduce the prevalence of behavioral health issues for Glades County youth. Hanley Foundation conducted a Sequential Intercept Mapping to develop the strategic plan for Glades County.

Performance Measures

Outcome data for the performance measures reflects progress through June 30, 2021 (Year 1, Quarter 4).

LIFE MANAGEMENT CENTER (BAY COUNTY) (LHZ94) END:

START: July 1, 2020 **END:**

Secondly, a major component of the program is the creation of a dedicated forensic day services program, which is a partial day program with the capacity to serve 24 clients at any given time. The program is targeted for individuals involved in the criminal justice system who are at risk for supervision failure that need a safe, structured environment during the day to reduce potential for recidivism. Clinical staff at the day program conduct therapeutic evidence-based groups such as Seeking Safety, Thinking for A Change, and Decision Points. Services may also include life skills curriculum, and competency restoration services.

Third, additional staff are engaged to assist the Apalachee Center Outpatient Fo(A)3.3 ( )0.6 cured 4/.4 (a)68p31.4 ()3-]TJ-

Anger Management

Cognitive Behavioral Therapy (CBT)

Assess, Plan, Identify, Coordinate (APIC) model

Measure	Performance
A minimum 80% of participants are assisted in	

Goals/Objectives

The primary goal of the program is to create a recovery-oriented, consumer-focused approach to behavioral health services and supports that eliminates re-involvement in the juvenile/criminal justice system by youth and young adults with behavioral health needs.

Broward Behavioral Health Coalition's three main objectives:

1. Effectively divert and treat youth and young adults with mental health, substance use, and/or co-occurring disorders who are in or at risk of entering the justice systems
2. Provide an information system to track youth and young adults during their involvement with the BYRC, and for at least one year after program discharge
3. Create and encourage collaboration among key stakeholders

Summary of the Effect of the CJMHSA Reinvestment Grant Program on the Growth and Expenditures of the Jail, Juvenile Detention Center, and Prison

CTC was able to impact cost savings in Sarasota County. With a total of 106 arrests one year prior to entry into the program, Sarasota County Government reported a $2,000 cost for each arrest to process individuals (arrest, booking, first appearance), the cost for Sarasota County was $212,000. Then, using the same $2,000 per arrest, these 62 individuals incurred 10 arrests while in the program, with a total cost of $20,000. In the year after discharge, there have been 3 arrests with a total cost of $6,000. To show a financial impact due to programming, the grantee subtracted cost for the year after discharge and arrests that occurred while in programming from the cost one year prior to admission ($212,000-$26,000). This approximates $186,000 savings to Sarasota County in year 2 quarter 2.

Summary of the Effect of the CJMHSA Reinvestment Grant Program on the Availability and Accessibility of Effective Community-Based Mental Health and Substance Use Services and How Expanded Community Diversion Alternatives Reduced Incarceration and Forensic Commitments to State Mental Health Treatment Facilities

CTC staff continue to build collaborative relationships within the community promoting best practices for the target population. This includes the ability to offer increased services (e.g. peer support services, basic need support, health resources, housing opportunities). Additionally, the CTC offers Mental Health First

EPIC BEHAVIORAL HEALTHCARE (ST. JOHNS COUNTY) (LHZ83)

EPIC Behavioral Healthcare's (EPIC) grant program, the St. Johns County Jail-Based EPIC Transition Program (JET)

START: July 10, 2019* **AWARD:** $1,200,000 **TIME FRAME:** 3 years

Target Population

The target population is adults, 18 years of age or older who have a mental health, substance use, and/or co-occurring mental health and substance use disorder; who are sentenced to jail or about to be sentenced to jail; and are considered high utilizers of criminal justice and behavioral health services.

Program Design/Model

The St. Johns County Jail-Based EPIC Transition Program (JET) is a care transition program for individuals discharged from the St. Johns County Jail. The JET Program develops and implements care coordination to reduce recidivism among program participants. Program staff improve their transition into the community through providing coping skills training, conduct discharge planning prior to release from jail, provide behavioral health treatment and linkages to appropriate services when they return to the community. The JET Program supports pre-booking diversion through Crisis Intervention Team (CIT) training, in-jail treatment, and post-booking diversion through the problem-solving courts such as Adult Drug Court and Veteran's Treatment Court. The JET Program reports more than thirty (30) partners that directly support program participants or serve as key stakeholders in the program's implementation.

Goals/Objectives

The primary goal of this grant program is to expand diversion programs for adults with a history of criminal justice involvement who are at risk of reentering the criminal justice system or a state mental health treatment facility and divert them into community services and treatment.

EPIC's grant objectives include:

1. Increase public safety, avert increased spending on the criminal justice system, and improve the accessibility and effectiveness of treatment services.
2. Create and encourage collaboration among key stakeholders.

GADSDEN COUNTY SHERIFF'S OFFICE (LHZ96)*

The Gadsden County Sheriff's Office (GCSO) grant program, Gadsden County Criminal Justice Diversion Program (GCCJDP)

START: May 1, 2020 **AWARD:** $1,200,000 **TIME FRAME:** 3 years

Target Population

The target population for the GCCJDP is adults 18 or older, who come in contact with law enforcement, are charged with a crime, brought to the jail for screening, have been determined as having behavioral health issues, and are evaluated and determined to have a substance use disorder or co-occurring disorder.

Program Design/Model

To promote diversion and reduce recidivism among the target population, the GCCJDP implemented post-booking alternatives to incarceration. The GCCJDP provides evidence-based screening for admission to the program, care coordination, HIV prevention services, and substance use treatment services. Evidence-based screenings conducted by the pre-trial release screener include Columbia S1 (ni)

Individuals Enrolled	37			

Summary of the Effect of the CJMHSA Reinvestment Grant Program on the Availability and Accessibility of Effective Community-Based Mental Health and Substance Use Services and How Expanded Community Diversion Alternatives Reduced Incarceration and Forensic Commitments to State Mental Health Treatment Facilities

The GCCJDP created a partnership between the Gadsden County Judicial Court system, Gadsden County Criminal Justice Systems, Gadsden County Health Department, and several community-based treatment providers. As time progress, it is expected that the officers and front-line workers of the target population will be trained and become more aware of how to identify and treat individuals experiencing behavioral health issues in Gadsden County through CIT training and newly implemented screening tools during booking to identify behavioral health needs to provide recommendations to the courts for possible diversionary opportunities. As a result, this will reduce the rate of unnecessary incarceration and promote community-based treatment.

During year two quarter one, there were no direct impact on the reduction of forensic commitments to state mental health treatment hospitals.

Summary of How Local Matching Funds Leveraged Additional Funding to Further the Goals of the Reinvestment Grant Program

As of July 31, 2021, Gadsden County Sheriff's Office expended/leveraged $656,134.33 or approximately 73% of the three-year match commitment for their CJMH Hieevsthe -1.4 ( )80.003 Ts5ro

November 1, 2017	October 31, 2020, no cost extension until April 30, 2021	$1,200,000	3 years

Target Population

The target population for the CCP was Duval County youth under age 18, referred by the Department of Juvenile Justice who:

- Have an indication for mental health and/or substance use (indicated on the Positive Achievement Change Tool (PACT) assessment);
- Have a moderate or high risk of becoming homeless when departing the Juvenile Assessment Center (JAC);
- Are at risk for re-entering the juvenile system; and
- Are eligible for a diversion program.

These youth were assessed and/or served by the JAC and/or the Jacksonville Youth Detention Center

Summary of the Effect of the CJMHSA Reinvestment Grant Program on the Availability and Accessibility of Effective Community-Based Mental Health and Substance Use Services and How Expanded Community Diversion Alternatives Reduced Incarceration and Forensic Commitments to State Mental Health Treatment Facilities

The FCST is instrumental in serving clients with mental health problems and co-occurring disorders who would not have access to services without grant funds. Program services are tailored to their unique needs and serve to divert participants from incarceration and deeper involvement in the justice system.

The grantee did not assess any clients to be at risk for admission to a state mental health treatment facility.

Summary of How Local Matching Funds Leveraged Additional Funding to Further the Goals of the Reinvestment Grant Program

As of June 30, 2021, LifeStream has expended/leveraged $246,082.63 or approximately 21% of the three-year match commitment. Match funds support an increased number of participants to be served and improve the array of services available to program participants including opportunities for residential treatment and medications. In-kind match funds support staff FTE and training initiatives such as CIT.

2. Create and encourage collaboration among stakeholders in implementing the strategic plan and providing ongoing oversight and quality improvement activities.
3. Promote workforce development through additional trainings that address the needs identified in the strategic plan.

result. Services were expanded to meet psychiatric, housing, medical, financial, and other life skill, and social support needs.

Throughout the duration of the grant program, only one participant assessed met criteria for state hospital admission and was diverted to this program.

Summary of How Local Matching Funds Leveraged Additional Funding to Further the Goals of the Reinvestment Grant Program

As of July 31, 2021, Marion County expended/leveraged $1,004,557.99 or approximately 76% of the three-year match commitment. Match funds supported program staff, travel, and consultant costs and additional administrative and operations functions to support the grant program.

MANAGED ACCESS TO CHILD HEALTH (DUVAL COUNTY) (LHZ82)

Managed Access to Child Health (MATCH) / Partnership for Child Health's grant-funded program, Wraparound and INtervention Strategies (WINS) initiative

START:	AWARD:	TIME FRAME:
July 30, 2019*	$1,200,000	3 years

Target Population

The target population includes youth under age 18 with identified mental health and trauma indicators who are:

- Referred by the state attorney's office for diversion with High-Fidelity Wraparound (HFW); or
- On probation or have received technical violations and are at risk of commitment, and who are referred by the Department of Juvenile Justice for Juvenile Mental Health Court.

Program Design/Model

The WINS program builds on the success of the Kids Hope Alliance / City of Jacksonville reinvestment grant program and aims to fill the intervention gap in the continuum for low and modesige6.1V1.7 (odes)-13 (t)39o0.5 (t)3.

Number Served through June 30, 2021 (Year 2, Quarter 4)

Number Served (youths consenting to receive WINS array of services)	112	545	-	657
Number Served Target	230	230	230	690
Law Enforcement Training	61	137	-	198
Law Enforcement Training Target	100	100	100	300

Performance Measures

Outcome data for the performance measures reflect progress through June 30, 2021 (Year 2, Quarter 4).

COVID-19 Exemption requests were submitted and approved in August 2020, October 2020, January 2021, and April 2021 for a variety of performance measures and service targets. Notably, the grantee reported that program graduations have been delayed due to COVID-19 and previous transitions to virtual services impacted program referrals. The grantee ultimately met the performance measure goals but had assumed higher program completion rates and numbers served. Changes to program administration, adjustments to virtual programming and gradual transitions back to in-person services are anticipated to mitigate barriers to future challenges associated with these targets.

Measure	Performance

MARTIN COUNTY BOCC (LHZ89)*

Martin County's grant program, the Martin County Mental Health Court (MHC)

START:	AWARD:	TIME FRAME:
June 1, 2020	$951,000	3 years

Target Population

The target population for the MHC includes adults who have a mental health, substance use, and/or co-occurring disorder; who are in, or at risk of entering the criminal justice system; and referred to the MHC.

Program Design/Model

The CJMHSA Reinvestment grant enables Martin County to expand and improve the existing Mental Health Court (MHC). The MHC was established in 2007, is an expansion of the 2017-2020 reinvestment grant and is a voluntary program for individuals charged with misdemeanor or felony offense who have a mental health disorder. The expansion of the MHC increases the caseload to 75-to-100 participants at a time.

Summary of How Local Matching Funds Leveraged Additional Funding to Further the Goals of the Reinvestment Grant Program

As of August 31, 2021, Martin County has expended/leveraged $366,329.35 or approximately 39% of the three-year match commitment. Martin County's match contribution support six (6) grant program staff, grant administration costs and other direct service expenses. In addition, sustainability planning is underway, and the County is exploring the availability of local funding through drug lab fees, court costs, fines, and other municipal fees to assist with supporting program activities upon grant expiration.

MERIDIAN BEHAVIORAL HEALTHCARE, INC. (ALACHUA AND BRADFORD COUNTIES) (LHZ85)

Meridian Behavioral Healthcare's (Alachua and Bradford Counties) grant program, the Meridian Forensic Diversion Program (FDP)

START:	AWARD:	TIME FRAME:
April 27, 2020*	$1,500,000	3 years

Target Population

The target population for the Forensic Diversion Program is adults who have a mental illness, substance use disorder, and/or co-occurring mental health and substance use disorder and who are in, or at risk of entering the criminal justice system. This includes, but is not limited to:

Individuals with chronic mental illness who have misdemeanor charges and do not me criteria for mental health court or have high arrest recidivism rates.

Individuals with chronic mental illness who are judicially determined as restored to competency and subsequently released to the community; and

Individuals who have been identified as "high utilizers" of the jail and acute services.

Program Design/Model

The Meridian Forensic Diversion Program (FDP) is an expansion of the Alachua County Criminal Justice and Substance Abuse Reinvestment Grant Program (CJMHSAG) which was awarded an implementation grant in 2007 and most recently in 2017-20. The FDP is a coordinated care, team-based approach, with the goal of helping high-need, high-risk individuals navigate complex service systems as they transition from jail to the community. The program provides ongoing, direct recovery-oriented services to program participants including diversion services such as outreach, screening and assessment, case management, treatment and aftercare, and expanded assessment of criminogenic needs through use of the RNR model.

Goals/Objectives

The primary goal of the grant program is to divert adults with a history of criminal justice involvement who are at risk of recidivism in the criminal justice system or commitment to a state hospital system by

OPERATION PAR (PINELLAS COUNTY) (LH319)

Operation PAR's grant program, the Pinellas County Behavioral Health Treatment Pilot

START:	ENDED:	AWARD:	TIME FRAME:
November 15, 2017*	October 31, 2020	$614,250	3 Years

Target Population

The Pinellas County Behavioral Health Treatment Pilot supported by Operation PAR was designed to serve adults brought to the Pinellas County Jail and placed in protective custody pursuant to the Marchman Act under s. 397.677, F.S., as well as individuals released from a Baker Act Receiving Facility who have a co-occurring mental health and substance use disorder and are assessed as at risk of involvement in the criminal justice system.

Three criteria determine the eligibility of an individual to receive services in this program:

Placed in protective custody pursuant to the Marchman Act under s. 397.677, F.S.; or

Referred to the Program upon release from a Baker Act receiving facility; and

Identified based upon pre-admission screening utilizing the Global Appraisal of Individual Needs Short Screener (GAIN-SS) that screens for mental health and substance use disorders and calculates the risk of recidivism within 6 months; have substance use or co-occurring disorders; and identified as at risk for criminal justice involvement.

Program Design/Model

Operation PAR's pilot program assisted individuals with substance use disorders and/or co-occurring mental health and substance use disorders. Potential program participants were identified through a pre-admission screening administered by Personal Enrichment through Mental Health Services (PEMHS). Following the pre-admission screening, if the individual was eligible for referral and agreed to participate in the program, PEMHS and Operation PAR arranges for the individual to begin treatment at Operation PAR.

Partners for the Recovery Team included the Pinellas County Sheriff's Office (PCSO), PEMHS, and Central Florida Behavioral Health Network (CFBHN). PEMHS administered the pre-admission screening in the Pinellas County Jail, using the GAIN Short Screener (GAIN-SS).

Operation PAR provided program participants with voluntary detoxification services, case management, navigation services, residential substance use treatment, and outpatient substance use treatment. A case manager and recovery support specialist assisted participants in making the transition from detoxification including addressing such basic needs as housing, employment, benefits, and education. PEMHS provides program participants with co-occurring mental health outpatient treatment.

PINELLAS COUNTY BOCC (LHZ91)

Pinellas County’s grant program,

1. Expand program services to improve the accessibility and effectiveness of treatment and support services for the target population within three months of grant execution
2. Creating and encouraging collaboration among key stakeholders
3. Ensure performance measurement outcomes are met and implement ongoing quality assurance initiatives

Summary of the Effect of the CJMHSA Reinvestment Grant Program on the Availability and Accessibility of Effective Community-Based Mental Health and Substance Use Services and How Expanded Community Diversion Alternatives Reduced Incarceration and Commitments to State Mental Health Treatment Facilities

The grant program supports two full-time therapists, two full-time case managers, and one juvenile attorney in the Public Defender's Office. The addition of these personnel allow the program to better address gaps in services as well as serve a larger number of youth in need of services.

No clients were diverted from SIPP placements during year 1 quarter 4.

Summary of How Local Matching Funds Leveraged Additional Funding to Further the Goals of the Reinvestment Grant Program

POLK COUNTY BOCC (LHZ77)*

Polk County's grant program, Roots (housing component) of Polk County's Helping Healthcare: Access, Navigation, Delivery, and Support (Helping HANDS)

START:	ENDED:	AWARD:	TIME FRAME:
September 1, 2018	August 31, 2021, no cost extension through February 28, 2022	$1,200,000	3 Years

Target Population

The target population for Roots was adults with mental health, substance use, and/or co-occurring disorders who were:

Homeless or an at-risk Polk County resident;

Enrolled in the Helping Hands Program;

Assessed using an Evidence- Based Mental Health assessment tool and diagnosed with Serious Mental Illness (SMI);

Receiving psychotropic medications and arrested two or more times within the past 12 months; or

An Inmate with behavioral health disorder referred by Polk County Sheriff's Office and/or Corizon Health; or

An individual with a history of arrests and mental illness referred by a partner agency;

Engaged in behavioral health treatment; and

Have a Helping HANDS Transition Plan in place.

Program Design/Model

The Roots Project supported the housing and sustainability components of the Polk County Helping HANDS jail transition program. Roots served Polk County's Helping HANDS clients who do not reside in stable housing or those who are at risk of homelessness. The Roots Housing and/or Benefits Specialists assisted the program participants though locating and securing housing, securing benefits to promote housing sustainability and providing housing vouchers with rent and utility assistance for up to six months. The program relied on eight (8) community partners and key stakeholders for implementation.

Goals/Objectives

The primary goal of the program was to divert individuals with a history of criminal justice involvement who are at risk of recidivism into either the criminal justice system or a state mental health treatment hospital and divert them into community-based treatment servicecco i15 (di) (it)1.5 29t

2. Create and encourage collaboration among key stakeholders.
3. Engage in training opportunities that support diversion activities.

officers engaged in CIT training increasing accessibility to a path to services for citizens of Seminole County.

During the lifetime of the grant, there was one diversion from a state mental health treatment facility. The impact on commitments to the state mental health treatment facility were limited as the program participants did not qualify for admission.

Summary of How Local Matching Funds Leveraged Additional Funding to Further the Goals of the Reinvestment Grant Program

As of December 31, 2020, Seminole County expended/leveraged $1,200,000 or approximately 100% of the three-year match commitment for their CJMHSA Reinvestment grant. Seminole County utilized match funds to track adult and juvenile Baker Act admission and address homelessness among program participants (personnel and direct costs). Aspire Health Partners and the Seminole County Sheriff's Office is also providing some match.

SMA HEALTHCARE
(FLAGLER COUNTY) (LHZ78)*

Evidence-

the Indian River County Sheriff's Office. The program relies on the partnership and direct collaboration of nearly thirty (30) key stakeholders and providers in the community.

Goals/Objectives

The primary goal of the grant program is to divert adults with a history of criminal justice involvement who are at risk of re-incarceration to community-based treatment and support services.

Summary of the Effect of the CJMHSA Reinvestment Grant Program on the Availability and Accessibility of Effective Community-Based Mental Health and Substance Use Services and How Expanded Community Diversion Alternatives Reduced Incarceration and Forensic Commitments to State Mental Health Treatment Facilities

With the support of this grant, the program has been able to expand community-based resources, including two (2) peers and one (1) therapist located at a local drop-in center. Additionally, the grant has been able to expand substance us disorder treatment to individuals with co-occurring disorders and assist with the development of wraparound supports, like housing.

As of June 30, 2021, the program reports that three (3) participants were diverted from the state hospital and instead receive intensive case management and additional community services.

A component of this expansion project is the use of High-Fidelity Wraparound for high-risk participants. The grantee reports that the high service utilizers that have been referred to wraparound thus far (24) have experienced reduced rates of hospital admissions and stabilized housing situations.

Summary of How Local Matching Funds Leveraged Additional Funding to Further the Goals of the Reinvestment Grant Program

As of June 30, 2021, Southeast Florida Behavioral Health Network expended/leveraged $439,552 or approximately 33% of the three-year match commitment. Match funds support an increased caseload for the MHC and the capacity to follow MHC alumni for one year. Match funds are also used to support in-jail psychiatric and medication services.

Objectives included:

1. Modifying the Coordination of Care model for OSC to address implementation of a mental health court and expansion of services.
2. Creating and encouraging collaboration among key stakeholders.
3. Planning, developing, and adjusting as needed a sustainability plan.

THE CJMHSA TECHNICAL ASSISTANCE CENTER

This section summarizes the CJMHSA TAC's technical assistance during FY2020-21. Technical assistance activities include assisting applicants who are pursuing reinvestment grantees in developing and reviewing their grant proposals, collaborating with grantees in projecting and monitoring the effect of grant-funded interventions on the criminal justice system, acting as a clearinghouse for disseminating information on best practices, facilitating Sequential Intercept Mappings, and providing training and resources relevant to the criminal justice system; the juvenile justice system; and mental health, substance use and/or co-occurring disorders.

COVID-19 IMPACTS ON CJMHSA TAC PROGRAMMING

Much like the rapid modifications that took place among grantees, the TAC also pursued key program changes to comply with COVID-19 prevention measures dictated by the University of South Florida, the Governor's Executive Order, and CDC guidelines in early FY20. With substantial University-wide travel restrictions and remote work orders in place beginning in April 2020, the TAC adapted its technical assistance delivery in order to provide meaningful and effective virtual technical assistance. This was

will continue to supplement a slow return to on-site technical assistance and allow for flexible options grantee communities to choose from.

COMMON PROGRAM FEATURES AND MODELS ACROSS GRANTEES

RECOMMENDATIONS

Recommendations and Suggested Strategies for Furthering the Development of the CJMHSA TAC and the Reinvestment Grant Program

The USF CJMHSA TAC offers the following recommendations for quality improvement in the existing CJMHSA Reinvestment Grant programs as well as for future grantees.

County-level/Program-level Strategies

Establish realistic targets based on local data for performance measures in grantee contracts.

Identify telehealth strategies and other best practices employed as a result of COVID-19 to determine opportunities for sustainability and flexibility in future procurements.

CJMHSA Technical Assistance Center Strategies

Develop infrastructure to facilitate peer learning collaborative for grantees.

Assess COVID-19 impacts on grantees and identify needs to support COVID-19 related technical assistance.

Promote best practices associated with the use of telehealth and virtual services.

Promote resources on quality implementation of co-occurring capabilities services.

Continue to work with DCF SAMH to improve quarterly progress reporting by grantees.

Provide tools and examples that can be used to assess cost avoidance and cost savings of grant programs.

Expand data and evaluation capacity to assist grantees in program planning and evaluation.

Enhance understanding of and participation

SUMMARY OF FY20-21 TECHNICAL ASSISTANCE

Activities and Accomplishments

Per LH289 section C-1.1.2.2, the CJMHSA TAC must conduct a technical assistance needs assessment survey at the beginning of each fiscal year. **Table 9** presents dates of dissemination.

Table 9.

Solicitation Group	Date Disseminated

October 27, 2020 Webinar

Dr. Nev Jones and Justin Volpe and Cindy Schwartz representing grantee Miami-Dade County facilitated the quarterly webinar on October 27, 2020. The webinar, titled, "Exploring and Expanding the Use of Peers in Criminal Justice and Behavioral Health Settings" provided a personal account of Peer Specialist Justin Volpe's recovery experience, a deeper look at the Miami-Dade County's utilization of peers in their reinvestment grant program, and the research surrounding the use of peer specialists in the fields of behavioral health and criminal justice. There were 85 individuals in attendance. The CJMHSA TAC also offered 2 credit hours of clinical CEUs for this webinar.

March 2, 2021 Webinar

Dr. Micah Johnson facilitated the webinar on March 2, 2021 titled, "Juvenile Justice Involvement and the Intersection between Trat

and four implementation/expansion grants. Grantees include two providers, two managing entities, and one county government.

On November 29, 2018, DCF SAMH released RFA 112818HSET1 and on March 15, 2019, DCF awarded 11 new grants: two planning and nine implementation/expansion grants. Grantees included seven providers, two managing entities, and two county governments. On July 18, 2019, DCF SAMH revised their agency decision and conditionally awarded eight additional grants: three planning grants and five implementation/expansion grants. Conditional grant funding was awarded toadditoad (i)-4.7 (n)-4 (ve)2.76 (oad (i) (i)1.5 (

APPENDIX B: GRANTEES—HISTORICAL SNAPSHOT

Historical Snapshot of CJMHSA Reinvestment Grantees

Appendix B presents a historical snapshot of all CJMHSA Reinvestment Grantees to date, including those outside of this current reporting period (FY20-21). Grantees may be county governments, managing entities, sheriff's offices, or private, not-for-profit providers. Grantees are listed alphabetically by county in which the grant was/is implemented. If the grantee is not a county government entity, the grantee's name is listed in parentheses under the county's name. **Bold** text indicates active grants as of the FY20-21 annual report period.
